Professional Experience

Audvik Labs

Feb 2026 – Present

Data Scientist

- Developed backend modules for an enterprise AI-powered ticketing platform using **Django REST Framework**, REST APIs and Postman, ensuring secure authentication and reliable API validation.
- Built an AI-powered **Tender Product Matching** solution by designing prompt-driven workflows and structuring enterprise product datasets for automated retrieval.
- Developed a Python-based PII masking pipeline using Microsoft Presidio to detect, tokenize and redact confidential information before LLM processing
- Developed a production-ready mobile application using Microsoft Power Apps and Power Automate for Unilever's Skin Care Innovation Library with OCR-enabled workflow automation.
- Curated and annotated computer vision datasets for **Crompton, Himalayan ORDO and Tata Tea** using Roboflow, supporting AI models for automated quality inspection.
- Implemented SMTP email notifications and validated backend APIs for an enterprise Learning Management platform.

Uber

Jun 2025 – Aug 2025

Data Science Intern

- Developed machine learning models to predict Bengaluru traffic patterns using feature engineering and predictive analytics.

Compsoft Technologies

Aug 2022 – Oct 2022

Full Stack Developer Intern

- Developed responsive web applications and integrated REST APIs using HTML, CSS, JavaScript and backend technologies while collaborating with the development team.

Featured Projects

Enterprise Skin Care Innovation Library (Unilever)

- Developed a responsive enterprise mobile application using **Microsoft Power Apps** integrated with SharePoint for ingredient and prototype management.
- Automated bulk upload workflows using **Power Automate**, enabling efficient data ingestion and reducing manual effort.

Secure PII Document Masking System

- Built a secure document redaction pipeline using **Python** and **Microsoft Presidio** to detect, tokenize and mask confidential information before AI processing.
- Integrated OCR and document preprocessing workflows while preserving document usability for downstream LLM applications.

AI Tender Product Matching

- Developed an AI-assisted product recommendation workflow using prompt engineering and structured enterprise datasets to automate tender product matching.

Traffic Prediction using Machine Learning

- Built predictive machine learning models using Python, feature engineering and exploratory data analysis to forecast Bengaluru traffic conditions.

Technical Skills

Languages: Python, SQL, JavaScript

AI/ML: Scikit-learn, TensorFlow, PyTorch, XGBoost, OpenCV, Computer Vision, OCR, LLMs, Prompt Engineering

Backend: Django, Django REST Framework, REST APIs, Postman

Power Platform: Power Apps, Power Automate, SharePoint

Tools: Git, GitHub, Docker, Power BI, Roboflow, Jupyter Notebook, Google Cloud Platform

Education

Rajarajeswari College of Engineering

Bengaluru, India

Bachelor of Engineering – Computer Science and Engineering

CGPA: 7.5/10

2019-2023

Relevant Coursework: Data Structures, Algorithms, Machine Learning, Database Management Systems, Operating Systems

Certifications

- Professional Certificate in Artificial Intelligence & Data Science by Microsoft– upGrad
- Google Cloud Gen AI Academy, Explore Generative AI with Vertex AI Gemini API
